recent scientific and technical advances have made it possible to create matter in the laboratory under conditions relevant to
astrophysical systems such as supernovae and black holes these advances will also benefit inertial confinement fusion research
and the nation's nuclear weapon's program the report describes the major research facilities on which such high energy
density conditions can be achieved and lists a number of key scientific questions about high energy density physics that can
be addressed by this research several recommendations are presented that would facilitate the development of a
comprehensive strategy for realizing these research opportunities

the 1985-86 apparition of halley's comet turned out to be the most important apparition of a comet ever it provided a
worldwide science community with a wealth of exciting new discoveries the most remarkable of which was undoubtedly the
first image of a cometary nucleus halley's comet is the brightest periodic comet and the most famous of the 750 known
comets with its 76 year period its recent appearance was truly a once in a lifetime observational opportunity the 1985-86
apparition was the thirtieth consecutive recorded apparition five apparitions ago the english astronomer edmond halley
discovered the periodicity of his comet and correctly predicted its return in 1758 a triumph for science best appreciated in
the context of contemporary views or rather fears about comets at that time the increasingly rapid progress in technological
development is very much apparent when one compares the dominant tools for cometary research during halley's next three

apparitions in 1835 studies were made based on drawings of the comet in 1910 photographic plates were used while in March 1986 an armada of six spacecraft from four space agencies approached the comet and carried out in situ measurements 1 au from the Earth in 1910 nobody could have dreamed that this was possible and today it is equally difficult to anticipate what scientists will be able to achieve in 2061
